Decision Invest in assets that earn a return greater than the minimum acceptable hurdle rate

## **CAPITAL STRUCTURE: 'THE CHOICES' AND 'THE TRADE OFF'**

Capital Structure Policy involves a trade-off between risk and return 1) Using more debt raises the riskiness of the firm's earnings stream. 2) However, a higher debt ration generally leads to a higher expected rate of return. □ Higher risk tends to lower a stock price, but a higher expected return raises it. □ Therefore the optimal capital structure strikes a balance between risk and return so as to maximize a firm's stock price.

## **Chapter 14: Capital Structure in a Perfect Market**

Capital is the amount of money or assets supplied by the firm's owners or creditors. Capital structure is a mixture of the sources of funds used to finance the firm's resources. Optimal capital structure is a type of capital structure that will yield the firm's lowest weighted average cost of capital (WACC) and maximize its intrinsic value.
