Double Vision

Double vision can occur with one eye or both. If it's in one eye when the other is closed, it is less worrisome, but still serious. If it occurs when both eyes are open, it could signal a major...

Double Vision (Diplopia): Causes, Symptoms, Diagnosis, and ...

Double vision occurs when a person sees a double image where there should only be one. The two images can be side by side, on top of one another, or both. The condition can affect balance,...

Double vision (Diplopia): Causes, diagnosis, and treatment

Double vision, also called diplopia, causes a person to see two images of a single object. There are two types of double vision: monocular and binocular. Monocular diplopia is double vision in only one eye. The double vision continues even when the other eye is covered.

Double Vision (Diplopia) Guide: Causes, Symptoms and ...

Double vision is the perception of two images of a single object seen adjacent to each other (horizontally, vertically, or obliquely) or overlapping. Diplopia is the medical term for double vision. Polyplopia is the perception of three or more images of a single object overlapping each other.

Double Vision Causes, Tests, Treatment & Symptoms

Diplopia, or double vision, can result if the eyes do not both aim in the same place either at a distance or up close," says Barbara Horn, a doctor of optometry and president of the American...

What Causes Double Vision? | US News

Double vision is a symptom of something abnormal going on within your eye, brain, or nervous system. The problem needs a complete evaluation in order to uncover the cause. In many cases, the extra...

Diplopia (Double Vision): Monocular and Binocular Causes

...

Double vision also can be caused by paralysis or loss of coordination of one or more muscles that control the position and teaming of the eyes due to a cranial nerve palsy. Cranial nerve palsies can be caused by diabetes, head injury, tumour, multiple sclerosis, meningitis, high blood pressure, blockage in an artery or an aneurysm.

Double vision | Causes and treatments of diplopia | All ...

If there is double vision when looking with the right or left eye alone, then the cause is ophthalmological—such as a cataract, a problem of the retina, or another eye disease. On the other hand, when double vision is present with both eyes open, but goes away upon looking with only one eye, the cause may be neurological.

and teaming of the eyes due to a cranial nerve palsy. Cranial nerve palsies can be caused by diabetes, head injury, tumor, multiple sclerosis, meningitis, high blood pressure, blockage in an artery or an aneurysm.

Double Vision (Diplopia): Causes, Definition & Treatments

Double Vision Causes A range of conditions can cause double vision, including problems within the eye, such as the cornea or lens. Other underlying causes can involve muscles or nerves controlling eye function and movement, or issues in the brain. Some causes can be minor, such as astigmatism, or life threatening, such as an aneurysm or stroke.

Causes of Double Vision | Stanford Health Care

Double vision means you are seeing two overlapping images instead of a single normal image. These images may overlap on top of each other or may appear side to side. Double vision is also known as diplopia or ocular misalignment. Common characteristics of double vision

10 Double Vision Causes: Explaining Double Vision Symptoms ...

Double vision, or "seeing double," occurs when two nonmatching images are sent to the part of the brain that is responsible for processing visual input. If this occurs over the long term, the brain will eventually compensate for the two signals by suppressing one signal, so that a single image is perceived.

Double Vision: Symptoms, Signs, Causes & Treatment

Double vision, also referred to as diplopia, is a condition in which a person seems to see double of everything. This can make it very hard for them to maintain their hand-eye coordination and balance and can lead to a number of problems if the problem occurs on a regular basis.

Double Vision: 10 Common Causes of Double Vision

Most Common - Blurred vision, double vision, impaired accommodation, dizziness, headache, drowsiness, nausea, muscle weakness, and fast heart rate

List of Drugs that may cause Double Vision

Binocular diplopia is double vision arising as a result of strabismus (in layman's terms "cross-eyed"), the misalignment of the two eyes relative to each other, either esotropia (inward) or exotropia (outward).

Diplopia - Wikipedia

"If you have double vision in the right eye and cover your left eye, you still see double." The problem originates in the eye itself. Many eye-related issues — including the need for glasses (for astigmatism, for instance), dry eyes, cataracts, and retinal disease in the macula — can cause monocular double vision.

Seeing Double? Get Your Vision Checked Promptly - Health ...

Double vision occurs when the brain cannot combine the images from each of the eyes into a single image. This is usually because the images are not similar enough, because of problems with the muscles or nerves that control precisely where each eye is looking. There are two main types of double vision - binocular and monocular.

Double Vision, Diplopia: Symptoms, Causes, Treatments

Double vision is a common symptom of myasthenia gravis, a chronic condition that causes muscles to grow tired easily. Having double vision can be deeply frustrating and get in the way of daily...
