Beyond that, the diagnostic procedure is a little more complicated. In order to determine whether the relay or switch is bad, you would have to check if the relay receives power when the headlight switch is activated. If it doesn't, then there is either a problem with the headlight switch or the wiring between the switch and the relay.

Headlights Not Working? Try These Fixes

There is a tool made for the spring , i made one from a small philips screw driver ,it is simply a hook on the end that reaches in and grabs the spring and hooks it to the bulb retainer trim ring .the bulb goes into the headlight can and the trim ring is hooked with the two screws over the bulb,.the whole assembly is hooked to the adjusters and then the spring to the stainless trim ring ,it can be a pain in the butt to hold it in place and hook the spring .
