### Rate Of Change Ib Hl Past Papers

(a) The circular Ferris wheel has a radius of 10 metres and is revolving at a rate of 3 radians per minute. Determine how fast a passenger on the wheel is going vertically upwards when the passenger is at point A, 6 metres higher than the centre of the wheel, and is rising.

### IB Questionbank - IB Documents

$dR/dt$  represents the rate of change of those who have recovered with respect to time. For example, if  $dI/dt$  is high then the number of people becoming infected is rapidly increasing. When  $dI/dt$  is zero then there is no change in the numbers of people becoming infected (number of infections remain steady).
