Stars Where are Stars Born? Astronomers believe that molecular clouds, dense clouds of gas located primarily in the spiral arms of galaxies are the birthplace of stars. Dense regions in the clouds collapse and form "protostars". Initially, the gravitational energy of the collapsing star is the source of its energy.

**WMAP- Life and
Death of Stars**

Then, as the star's life ends, those basic principles once again come into play to describe what will happen to the star next. Astronomers study various aspects of stars to determine how old they are as well as their other characteristics. That helps them also understand the life and death processes they
