Exam Questions - Trigonometric identities | ExamSolutions

Trigonometric identities (trig identities)

File Type PDF Trig Identities Questions And Solutions

are equalities that involve trigonometric functions that are true for all values of the occurring variables. These identities are useful when we need to simplify expressions involving trigonometric functions. ... a free math problem solver that answers your questions with step-by-step explanations.

Trigonometry questions, for grade 12 , related to identities, trigonometric equations, are presented along with their solutions and detailed explanations.

Trigonometry Problems and Questions with Solutions - Grade 12

File Type PDF Trig Identities Questions And Solutions

Lecture Notes Trigonometric Identities 1
page 4 6. $\cos^2 x = \csc x \cos x \tan x + \cot x$
Solution: We will start with the right-hand side. We will re-write everything in terms of $\sin x$ and $\cos x$ and simplify. We will again run into the Pythagorean identity, $\sin^2 x + \cos^2 x = 1$.
RHS = $\csc x \cos x \tan x + \cot x = \frac{1}{\sin x} \cos x \frac{\sin x}{\cos x} + \frac{\cos x}{\sin x} = 1 + \frac{\cos x}{\sin x} = \frac{\sin x + \cos x}{\sin x} = 1 + \frac{\cos x}{\sin x} \dots$
