Two Way Relative Frequency Tables - onlinemath4all

A two-way frequency table is a table that displays the frequencies (or "counts") for two categorical variables. For example, the following two-way table shows the results of a survey that asked 100 people which sport they liked best: baseball, basketball, or football. The rows display the gender of the respondent and the columns show which sport they chose:

How to Find Conditional Relative Frequency in a Two-Way Table

Create two-way relative frequency tables (practice) | Khan ...

Two-way frequency tables are a visual representation of the possible relationships between two sets of categorical data. The categories are labeled at the top and the left side of the table, with the frequency (count) information appearing in the four (or more) interior cells of the table. The "totals" of each row appear at the right, and the "totals" of each column appear at the bottom.

Two-Way Frequency Tables - MathBitsNotebook(A1 - CCSS Math)

To create a relative-frequency two-way table for all 50 people, divide each number in each cell by 50 Create a Relative Frequency table based on the total number of participants 6) You go to a dance and help clean up afterwards. To help, you collect the soda cans, Coca-Cola and Sprite, and organize them.
